PERSONAL PROJECTS

Drunk Behaviour Recognition

Developed drunk behavior recognition system for video analysis

- Crafted a novel video analysis solution employing RNN-CNN to identify drunk behavior, showcasing proficiency in machine learning, computer vision, and data preprocessing. Delivered notable outcomes in [mention key metrics], reflecting adept technical skills and analytical prowess.

ConnectVerse - DigitalConnect

Uniting Digital Realms for Dynamic Engagement

- Experience ConnectVerse, an innovative digital platform offering customizable blogs, task scheduling, Connecting With Others and more. Powered by PHP, MySQL, Bootstrap, CSS, and JavaScript, ConnectVerse delivers seamless online interaction. Join ConnectVerse and elevate your digital experience today.

SoundScape - Dynamic E-Commerce Platform for Premium Audio Products

Seamlessly Browse, Experience, and Purchase High-Quality Audio Gear with Intuitive Navigation and Interactive Features

- Developed a dynamic e-commerce platform using Quasar Framework to showcase and sell premium audio products. Features include an animated user interface, responsive design, real-time product filtering, and a seamless checkout process to enhance user experience and engagement.

Multilingual-Web Dictionary

The web application's primary goal was to offer users translations and definitions of words in three languages.(3 Language Model)

- To achieve this, I designed an intuitive and responsive user interface to ensure seamless navigation and effortless word searches. Moreover, the application's search prowess is exemplified by delivering an astonishing 95% accuracy rate in displaying context-enhancing images in direct response to user queries.

Portfolio Projects

Explore My Diverse Endeavors

- My portfolio encompasses diverse projects, including a multilingual dictionary, ConnectVerse library management system, and a drunken behavior detection system. Additionally, I've developed an e-commerce website tailored for handloom businesses. These projects showcase my versatility and expertise in various domains, from language processing to web development and machine learning.

TECHNICAL SKILLS AND INTERESTS
